## Professional Summary

Seasoned front-end developer with over a year of experience in building diverse projects using React and its libraries, including React Router, React Query, and Redux. Skilled in translating design specifications into responsive, user-friendly web applications. Passionate about delivering high-quality solutions and collaborating with cross-functional teams to enhance user experience.

## Work Experience

### Mid Level Front End Engineer

Synergy LTD

August 2024 – October 2024

- Developed various web pages based on Figma designs using Next.js and TypeScript.
- Collaborated with the backend team to ensure seamless integration and usability of front-end features.
- Implemented responsive design principles to enhance user experience across devices.
- Actively participated in code reviews and contributed to team discussions to improve overall code quality and performance.

## Education

Wolkite University | **Bachelor of Science in Computer Science** | Gurage, Ethiopia | Expected Graduation: August 2025

Key Focus Areas: Data Structures and Algorithms, Software Engineering, Web Development, Problem Solving.

## Projects

### Synergy LTD Web Development

- Description: First professional internship at a startup where I built the front end using Next.js, Tailwind CSS, and TypeScript based on Figma designs.
- Role: Developed user-friendly interfaces and collaborated with the backend team for seamless integration.
- Technologies Used: Next.js, Tailwind CSS, TypeScript
